Content

The course deals with classical and contemporary perspectives within the social science field of consumer behavior at an advanced level. These perspectives are discussed throughout the course in relation to fashion and how fashion as a phenomenon has been treated in the social sciences. The contemporary fashion sector and market communication in this field is treated and discussed in relation to consumer behavior. The course contains practical exercises in collecting empirical material for analyzing consumer behavior and reflections on possible applications in fashion business development. The course deals with established theories and methods used today in the field of consumer behavior to describe and analyze following dimensions:

- Consumption patterns on a societal level.
- The individual as a consumer.
- Cultural aspects of consumption.
- Relationships between consumption and production that shape everyday practices.
- Issues of societal development in terms of social and ecological sustainability in relation to the dimensions above.
