Content

The main contents and purpose of this course is to give the student an overview of the most basic concepts and procedures within business administration. The student shall understand how a contemporary business idea may be conceptualized, how the proposed product/service may develop and be marketed, how such activities can be financed and organized, and how all these processes may be monitored, analyzed and reported. This in order to create value, not only to the owner and the subsequent organization but all internal and external stakeholders to the company and its business. Apart from this the student will attain basic knowledge about ethical considerations in relation to these processes and decisions.

Learning Outcomes

After completing the course the student should be able to:

Knowledge and understanding

- 1.1. describe basic economic issues, processes and structures at company level,
- 1.2. describe the company's main approaches for the development and marketing of its products / services,
- 1.3. describe the company's main approaches to organizing, financing, operations and accounting
- 1.4. describe the company's internal and external stakeholders' roles as well as its main ethical aspects,

Skills and Abilities

- 2.1. apply basic business practices and models (eg in the textile context),
 - 2.2. apply basic models for analysis of economic issues in the textile business,
-
- 3.1. independently relate to and critically evaluate different business issues at the elementary level and
 - 3.2. constructive proposals for improvements in different business issues at the basic level.
