

## Final master degree thesis for textile engineering Examensarbete för magisterexamen, textilingenjör

15 credits

---

**Ladok Code:** TEX013

**Version:** 1.0

**Established by:** Research Board 2008-12-17

**Valid from:** Spring 2009

**Education Cycle:** Second cycle

**Main Field of Study (Progressive Specialisation):**

**Disciplinary Domain:** Technology

**Prerequisites:** Completed the courses that constitute the background to the Master's thesis or equivalent knowledge.

**Subject Area:**

**Grading Scale:** Fail (U), Pass (G) or Pass with Distinction (VG)

---

### Content

After completing this course, students will have a knowledge of how earlier training can be used for project development work and research projects. Degree work must prepare the way for research, and students have to have developed their ability to independently define, plan and implement a research commission.

### Learning Outcomes

After completing this course, students will have a knowledge of how earlier training can be used for project development work and research projects. Degree work must prepare the way for research, and students have to have developed their ability to independently define, plan and implement a research commission.

### Forms of Teaching

The teaching consists of guides.

Students themselves have to choose their degree work, formulate it and have it approved by an examiner.

One supervisor must be appointed at the company, and one at the Swedish School of Textiles/Borås College. However, the latter is not necessary if the degree work is carried out at a different college/university or at a research institute. Students may decide whether they want to do their degree work alone or together with another student. However, the company must give its approval for two students to work on a project, or for one student. The volume of effort required will, of course, be a lot larger if the degree work is done by two students.

### Forms of Examination

The course will be examined through the following examination elements:

*Written and oral presentation*

Learning outcomes:

Credits: 15

Grading scale: Fail (U), Pass (G) or Pass with Distinction (VG)

Student rights and obligations at examination are in accordance with guidelines and rules for the University of Borås.

### Literature and Other Teaching Materials

Course literature from the programme, as well as survey of relevant literature from the University Library.

**Student Influence and Evaluation**

The students' opinions are collected systematically and regularly through written course evaluations once the course is completed. One time per semester, student representatives, together with the Director of Studies and Programme Directors, evaluate completed courses.

For additional materials, please refer to the University's policy on course evaluation and documents established by the Department Board, the Director of Studies and the Course Director.

**Miscellaneous**

This course is primarily a programme course in the Master Programme in Textile Technology.
