

Resource Recovery I Resursåtervinning I

7.5 credits

7.5 högskolepoäng

Ladok Code: A519TA

Version: 4.0

Established by: Committee for Education in Technology 2021-04-09

Valid from: Autumn 2021

Education Cycle: Second cycle

Main Field of Study (Progressive Specialisation): Resource Recovery (A1N)

Disciplinary Domain: Technology

Prerequisites: Accepted for MSc in Resource Recovery (or equivalent).

Subject Area: Environmental Science

Grading Scale: Seven-degree grading scale (A-F)

Content

This course is a introduction course in Resource Recovery focusing on waste minimization, material recovery, energy recovery and material cycles. Together with material recycling and circular systems also ethical, social, legal and economical questions are discussed. How is the society affected, which waste streams are available, how is a working waste management system put together? The course also includes classifying of hazardous waste and REACH, together with different instruments and legislations in Sweden and EU as catalyst or obstacle for a circular economy.

Learning Outcomes

Upon completion of the course, the student must be able to:

Knowledge and Understanding

- 1.1 describe different incentives available for decision makers to reach their goals
- 1.2 explain the reasons behind and the motives for resource recovery
- 1.3 describe the steps in a recovery process that includes collection, sorting, demolition and identification
- 1.4 describe and explain which different techniques for recycling that is available, such as crushing, melting, pyrolysis.

Skills and ability

- 2.1 evaluate different recycling techniques in economic, environmental and social aspects
- 2.2 explain and discuss how waste management can be climate smart

Critical judgement and Evaluation

- 3.1 evaluate how the design of different waste management systems considers sustainability, society and ethics, in addition to conflicts in interest between them

Forms of Teaching

Tutorial language: English

The language of instruction is English.

Forms of Examination

Examination of the course occurs through:

- Written Exam (TE)
Learning outcome: 1.1-1.4, 2.1-2.2
Credits: 4.5
Grading scale: Seven-degree grading scale (A-F)
- Project work (IN1)
Learning outcome: 2.1-2.2, 3.1
Credits: 2.5
Grading scale: Passed or failed
- Study visit (ST1)
Learning outcome: 1.2
Credits: 0.5
Grading scale: Passed or failed

Study visits can be changed for assignments.

When all parts of the course have been passed the grade of the written examination determines the course grade.

If the student has received a decision/recommendation regarding special pedagogical support from the University of Borås due to disability or special needs, the examiner has the right to make accommodations when it comes to examination. The examiner must, based on the objectives of the course syllabus, determine whether the examination can be adapted in accordance with the decision/recommendation.

Student rights and obligations at examination are in accordance with guidelines and rules for the University of Borås.

Literature and Other Teaching Materials

Student Influence and Evaluation

The course is evaluated in accordance with current guidelines for course evaluations at the University of Borås in which students' views are to be gathered. The course evaluation report is published and returned to participating and prospective students in accordance with the above-mentioned guidelines, and will be taken into consideration in the future development of courses and education programmes. Course coordinators are responsible for ensuring that the evaluations are conducted as described above.

Miscellaneous
