Content

Human-made textiles are documented to be at least 30,000 years old and speculated to be several million years old. This course begins with a brief overview of the physical properties of fibers and fabrics but focuses on how textiles have shaped human development and functioned in various social, economic, and cultural contexts from pre-history to today. Textiles have been and remain important manifestations of status, belief and religious systems; agents of technological innovation and globalization; foundations for capitalism, industrialization, and modern economic development; political agents for transformation; and treasuries of both mundane and sublime aesthetic expression.

Learning Outcomes

After completing the course, the student should be able to:

Knowledge and understanding

- 1.1 With the help of relevant literature, independently explain and exemplify how textiles have changed and been changed by human development,
- 1.2 describe the fundamental physical components and structures of textiles,

Skills and Abilities

- 2.1 independently search for and select scientific articles and other relevant literature on the basis of a given issue,
- 2.2 from a contemporary or historical perspective discuss different forms and meanings for the production and use of textiles at a particular time and place,

Evaluation ability and approach

- 3.1 with clear support in relevant theory critically reflect on how one's own professional or personal practice, textile-related research, habits or interests can be related to issues such as identity, sustainability, economics, social progress, or cultural resonance.
