Grading Scale: Seven-degree grading scale (A-F)

Content

The course provides an introduction to basic perspectives and methods of trend analysis in fashion markets and systems. The aim of the course is to provide theoretical knowledge of trend analysis in the field, as well as practical skills to analyse trends within and relevant to fashion. The teaching should also provide knowledge about the importance of trends for - and application to - brands. The course is permeated by a holistic approach in which trends are understood regarding their aesthetic, economic, and socio-cultural dimensions. Sustainability, ethics, and marketing are key illumination points.

Learning Outcomes

After completing the course, the student will be able to:

Knowledge and understanding

- 1.1 Explain basic scientific perspectives on trend analysis in fashion markets and systems,
- 1.2 present key trend analysis methods in the field,
- 1.3 demonstrate knowledge of the importance of trends and their application to brands,
