Content

The course aims to develop students' technical skills for artistic interpretation through experimental knitting, through independent artistic design work, and through planning, preparing and presenting design work from initial idea through to the completion of garments for display, as well as to apply knowledge and abilities about colour in knitted and tricot fabrics. The main content of the course is as follows:

- Collection work from design of the knitted material to finished product
- Aesthetic possibilities through specialisation in experimental knitting
- Introduction to the production of knitted materials on industrial knitting machines, flat knitting and circular knitting
- 3-D sketching technology, modelling, and collection development
- Collection composition, presentation, and argumentation
- Creative exercises in colour theory for knits

Learning Outcomes

On completion of the course, students will be able to:

1. demonstrate the ability to develop new artistic expressions through technology-specific work,
2. demonstrate the ability to design and realise garment ideas and prototypes in jersey and knit with hand knitting machines,
3. demonstrate the ability to apply colour theory to knit and tricot fabrics,
4. demonstrate the ability to observe, reflect, and discuss colour interactions in one's own design work.
