### Content

The course aims to develop artistic ability in knitting technology through application and experimental examination of the expressive and functional opportunities offered by various technologies. The main content of the course is as follows:

- Basic binding theory for weft knitting
- Quality assessment of various products and bindings
- Experimental knitting
- Sketch work on selected knitting machines

### Learning Outcomes

Once the course has been passed, students should be able to:

1. describe the classification, structure, properties and construction of various knitted products,
2. analyse fabrics and structures in clear knitted examples, and describe and document these,
3. carry out and run experimental design work in knitting technology,
4. develop and communicate a design idea to knitwear engineers for implementation,
5. apply adequate technologies and materials in relation to their own design concept,
6. document and reflect on technology in relation to the design process.

### Forms of Teaching

The teaching takes the form of lectures, seminars, laboratory work, supervision and experiments.

The language of instruction is English.

### Forms of Examination

The course will be examined through the following examination elements:

Written exam (Learning outcomes 1) 2 credits Grading scale: Fail (U)/Pass (G)

Written assignment (Learning outcomes 2) 3 credits Grading scale: Fail (U)/Pass (G)

Documented presentation of and reflection on starting points, working methods and results (Learning outcomes 3-6) 2.5 credits  
Grading scale: Fail (U)/Pass (G)

Student rights and obligations at examination are in accordance with guidelines and rules for

the University of Borås.
